

Academic Regulations

B.Tech. Programme — NIT Arunachal Pradesh

5-Page Student-Friendly Summary

This document summarizes key provisions from the official Ordinances and Regulations (in light of NEP 2020) for Bachelor of Technology, applicable for the 2022 batch onward. It is intended as a quick-reference guide and is not a replacement for the official regulations.

1. Scope and Programme Framework

The B.Tech. programmes of NIT Arunachal Pradesh are governed by the Institute's B.Tech. Rules and Regulations. The official document lists programmes including Civil Engineering, Computer Science and Engineering, Electronics and Communication Engineering, Electrical Engineering, Mechanical Engineering, Chemical Engineering and Biotechnology.

2. Academic Calendar

- The academic year is divided into two semesters, each approximately 18 weeks long.
- The odd semester normally runs from July to December; the even semester from January to June.
- Each semester is expected to have at least 70 working days for classes.
- The Senate approves the academic schedule, including registration, examinations and inter-semester breaks.

3. Admission

- The number of seats in each undergraduate branch is decided by the Senate, with applicable Government of India reservation norms.
- Admission is made at the first-year level through the applicable JEE admission process.
- Admission may be revoked if the student is later found not to satisfy stipulated admission requirements.
- The Institute may require discontinuation for unsatisfactory academic performance or disciplinary grounds, subject to the applicable rules.

Key takeaway: The regulations define the academic calendar, admission framework, programme requirements and student responsibilities from the beginning of the B.Tech. programme.

Attendance, Leave & Academic Conduct

4. Attendance Requirements

- Attendance is compulsory in lectures, tutorials, laboratories, workshops, NCC, NSS and other registered academic programmes.
- A student with attendance below 75% may be debarred from the end-semester examination and awarded an Incomplete (I) grade.
- On medical grounds, permission to appear in the examination is subject to the decision of the competent Institute authority.
- A student below the attendance requirement may need to complete prescribed assignments, quizzes or tutorials after approval.
- If the required process is not followed, the I grade may be converted to F.

5. Leave of Absence

- For leave shorter than two weeks, prior application with reasons and supporting documents is normally submitted to the Head of Department.
- Absence of up to two weeks due to sickness or unavoidable reasons may be condoned by the Head of Department when the explanation is satisfactory.
- For absence likely to exceed two weeks, the application is routed through the Head of Department to the Dean (Academic) with supporting documents.
- The Dean (Academic) may determine whether a student should withdraw from the programme for that semester because of prolonged absence.
- Students must inform the hostel warden and relevant instructors before availing approved leave.

6. Conduct and Discipline

Students are expected to conduct themselves appropriately within and outside the Institute. The academic regulations refer to a separate Code and Conduct of Students for disciplinary matters.

7. Residence

- The Institute is described as a residential institution, with students ordinarily required to reside in an assigned hostel.
- Students must follow hostel rules framed by the Hostel Management Committee and approved by the Senate.

Student Checklist

- Track attendance regularly rather than waiting for examination registration.
- Submit leave applications through the correct authority and retain supporting documents.
- Check the official Academic Calendar for registration and examination deadlines.
- Follow both academic regulations and the separate student/hostel conduct rules.

Branch Change, Credits & Programme Structure

8. Change of Branch

- Branch change may be permitted after the first two semesters, subject to the regulations and available capacity.
- An eligible student must complete all credits prescribed for the first two semesters in the first attempt, without needing a summer examination.
- The regulations specify a minimum CGPA of 8.5 at the end of the second semester for eligibility.
- Applications are invited by the Dean (Academic) and choices are submitted in order of preference.
- Changes are considered in order of merit using second-semester CGPA; JEE rank is used in case of a tie.
- The permitted change becomes effective from the third semester and is final under the stated rules.

9. Course Structure and Credits

Courses are grouped into categories such as Science Core (SC), Engineering Science and Arts (ESA), Departmental Specific Core (DSC), Departmental Specific Elective (DSE), Open Elective (OE), Ability Enhancement Compulsory Course (AECC), Skill Enhancement Compulsory Course (SECC), Value Added Course (VAC), dissertation and laboratory components.

Credit Pattern

Learning component	Credit allocation
Lecture	1 credit per lecture period
Tutorial	1 credit per tutorial period
Laboratory / Practical / Project	0.5 credit per hour

The regulations prescribe 170 credits for the B.Tech. degree. They also provide multiple-exit provisions: a Certificate after 44 credits (first year), Diploma after 86 credits (second year), and Advanced Diploma after 133 credits (third year), subject to the conditions stated in the official regulations.

10. Internship & Electives

- Internship is a compulsory part of the undergraduate curriculum and must be satisfactorily completed before eligibility for the Advanced Diploma and Degree.
- The stated minimum internship duration is four weeks.
- Departmental Specific Electives are offered by the student's department.
- Students are required to take Open Electives offered by other departments as prescribed in their curriculum.

Registration, Grading & Assessment

11. Registration

- Students must register for approved courses at the beginning of each semester on the date notified in the Academic Calendar.
- Registration is required through the departmental undergraduate committee and is normally completed by the student in person.
- A student must pass all first-year subjects with a minimum CGPA of 4.00 before registering for the fifth semester.
- Students with first- or second-year backlogs are required to register for and attempt the applicable summer course.
- Late registration may be permitted within the prescribed period with the applicable late fee. The regulations state that registration beyond the additional 10-day period is not considered.

12. Duration of Programme

The normal B.Tech. duration is eight semesters. Under the stated provisions, students who need additional time may be permitted up to 14 semesters from first-semester registration, while regular continuing students are not permitted more than seven years to complete the B.Tech. degree.

13. Grading System

Grade	Points
AA	10
AB	9
BB	8
BC	7
CC	6
CD	5
DD	4
F	0
I	—

Percentage conversion

$$\text{Percentage of Marks} = \text{CGPA} \times 9.5\%$$

SGPA and CGPA are calculated using credit-weighted grade points and are rounded to two decimal places. The CGPA represents cumulative performance up to the relevant semester.

14. Theory Course Assessment

Component	Weightage
Two quizzes	10%
Mid-semester examination	30%

Assignments	10%
End-semester examination	50%
Total	100%

Examinations, Make-Up & Student Reference

15. Project Assessment

- Project work is normally conducted in two stages across two semesters.
- For the first stage, the regulations specify supervisor assessment (40%), project report (20%), and presentation/viva (40%).
- For the second stage, the stated components are supervisor assessment (40%), project report/thesis (20%), and evaluation board assessment (40%).

16. Review of Grades

- The evaluation process is intended to be transparent.
- A student may appeal for a review of grades to the Dean (Academic) through the course coordinator and Head of Department within the deadline specified in the Academic Calendar.
- If the grade is changed, the revised grade is incorporated into the student's mark sheet.

17. Examinations

- The Institute uses continuous assessment for theory, laboratory, sessional, seminar and project work.
- The regulations describe centrally conducted mid-semester and end-semester examinations.
- The stated duration is two hours for the mid-semester examination and three hours for the end-semester examination.
- Students may be debarred from an end-semester examination for disciplinary reasons, insufficient attendance, or unsatisfactory sessional performance.

18. Make-Up Examinations

- A student who misses an end-semester examination for a compelling reason may apply to the Dean of Academics through the Head of Department within seven days, with supporting evidence.
- Make-up examinations are scheduled according to the Academic Calendar.
- No centrally conducted make-up examination is provided for the mid-semester examination; the course coordinator determines an appropriate way to assess proficiency.

19. Summer Course

- Students receiving an F grade may be permitted to appear in the Summer Course examination and are required to attend the course.
- The assessment pattern follows the applicable continuous-assessment provisions.
- The prescribed course fee must be paid.
- The highest grade stated for a summer course is BC.

Quick Reference — Important Numbers

Requirement	Stated figure
Semester duration	≈ 18 weeks

Minimum working days	70 per semester
Minimum attendance	75%
B.Tech. degree credits	170
Branch-change CGPA threshold	8.5
First-year pass requirement before 5th semester	CGPA 4.00
Normal programme duration	8 semesters
Maximum for regular continuing students	7 years
Internship minimum duration	4 weeks
